

**A.1 Technical data**

A.1.1. Sofas with curved back and arms. (R=270)

A.1.2. The seating plate (25mm) is wooden and the arms are attached on it. Two metallic traverse beams are used to support the seating plate and offer maximum endurance. All parts are upholstered with polyurethane foam and fabric or leather from DROMEAS' catalogue.

A.1.3. The legs are made of INOX steel tube of circle cross-section of 40 mm diameter and 1,5 mm width. The front legs are 235mm long and the back 215mm.

A.1.4. The seating plate's pillows are made of casting polyurethane of high density. Back and seating plate are unified constructed by high density polyurethane foam.

A.1.5. Between the pillows and the sofa's body there is a hook-loop system in order to mount the pillow at a stable position.

A.1.6. All upholsteries can be removed by the use of a zipper.

The user can choose among 7 categories and a wide variety of colors.
