

DROMEAS

ACTION-D

Adjustable Headrest

Made of thermoplastic material. Lined with the same fabric of the seat

Adjustable Back

Black thermoplastic polyamide. It has independent height adjustment mechanism in 5 different positions, with a total height of 6cm. In addition, the back features built-in adjustable lumbar support for greater comfort.

Back Upholstery

Available in net, fabric and leather.

Adjustable Arms

Thermoplastic polyamide with height adjustment (70mm). In addition they have a width adjustment of 395-450mm.

The contact surface of the armrests is made of cast polyurethane of medium hardness for greater comfort and ergonomics. It has a rotation of 15 ° and can be moved back and forth in 6 positions

Synchro mechanism

With 5-way stabilization, anti-panic system and adjustment to user weight via tilt adjustment rotor. Allows synchronous tilting of the seat by 11 ° and backrest by 22 °

Base

5-star 660mm die cast aluminum, electrostatic painted

Twin wheels / Anti-slip soles

The wheels are twin made of reinforced thermoplastic material (polyamide). Optionally fixed soles instead of wheels
