

DROMEAS

SOFIA

Frame

The seat, back and arms are made of 25mm thick E1 grade three-layer particle board. They are lined with medium hardness foam and double-sided with selection wallpaper.

Height adjustment

The height adjustment of the seat is achieved through a gas piston, which is activated by a lever located below and side of the seat.

Base

Chrome-plated steel base
Φ12 solid with soles for hard floors and carpets.
